

Artistic brushes

85 years

Industrial scale and quality

It is unlikely that in all of Russia there is such a manufacturer of brushes, easels and other artistic materials from wood, wooden products for hobbies, school brushes - which could compete with "ArtAvangard", the factory of art materials.

"ArtAvangard" is a full production cycle manufacturer, from the initial processing of raw materials and to the final assembly.

The factory is already 80 years old. The famous Vyatka school of "Kirov kistevyaz" (brush makers) was born here.

Moreover, here once the small craft of the beginning of the last century has reached an industrial scale and quality!

Whether it's artistic brushes or professional products made of wood, hobby goods or school brushes - everything is made strictly according to modern technologies and using classical traditions.

The level of quality is highly appreciated by both simple buyers and top-class professionals. So for example, our brushes have used for restoration works in the Moscow Kremlin and for painting of Cathedral of Christ the Savior. We are the suppliers of brushes for the Imperial Porcelain Manufactory from St. Petersburg, the Zhostovo Factory, the Ariel Factory of Glass Christmas Decorations, and many others.

Quality of products of "ArtAvangard" is appreciated not only in Russian Federation. It gained trust in Germany, UK, Czech Republic, as well as in the Baltic and CIS countries.

We have made 1.5 billion art, school, industrial and other brushes for 80 years of our history! And about 1 million easels and other art materials. This is an absolute record in Russian Federation.

We are pleased that with help of our brushes, easels and other products, thousands of beautiful pictures have been written. Hundreds of thousands of beautiful products are made by own hands. And millions of children's drawings which are carefully stored in family albums.

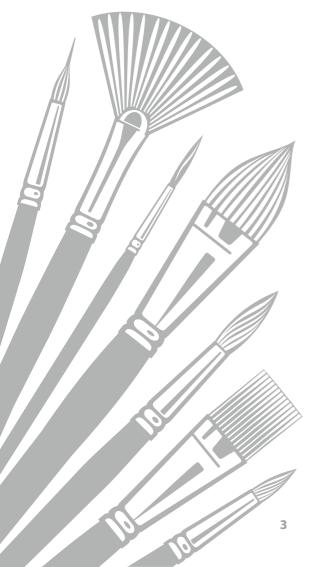

Brushes for professionals

- painting
